

Year Round Air Circulation

because saving money is never out of season

Did You Know?

- **Honeywell Air Circulators** circulate the air **faster** than traditional fans and can make air conditioning more efficient.
- Within **10 minutes** of using a typical Honeywell **Air Circulator**, the air in a room becomes a consistent temperature throughout, whereas it would take a traditional fan 150 minutes for the same effect.
- Honeywell Air Circulators can move between **27 and 39 feet** of air!
